

Z-statistic distribution: Published vs. NBER working papers (histogram trimmed to $|z| \leq 6$; caliper uses full sample)

Published papers
N=7,761 stats, 108 papers
Caliper ratio = 1.20 ($p_{\text{oout}} = 0.150$, clustered)

NBER working papers
N=8,351 stats, 106 papers
Caliper ratio = 1.01 ($p_{\text{oout}} = 0.432$, clustered)
